FOR IMMEDIATE RELEASE

QuikServe Solutions Edges Out National POS Companies; Awarded Taco John's International's Technology RFP

Omaha, NEB – Over the past 12 months, Taco John's International, based out of Cheyenne, Wyoming, has been conducting a request for proposal (RFP) in regards to the point of sale (POS) and back of house (BOH) technologies used in their 400+ quick service restaurants. QuikServe Solutions, along with over a dozen other nationally recognized restaurant technology companies, responded to this very detailed RFP. From that group of a dozen plus firms, seven were chosen who then demonstrated their products and capabilities to corporate representatives as well as a couple franchisees for review and analysis. Finally, the choice was narrowed to two vendors for further detailed discussions and project development.

QuikServe Solutions is pleased to announce we have been selected as the sole, preferred POS and BOH vendor for the Taco John's International brand. Our business with Taco John's has grown significantly since 2004 when we added our first franchisee to the QuikServe Solutions family of customers. Presently, our POS and BOH products are implemented in over 160 corporate and franchised Taco John's units and we are eager to be a part of the brand's growth. Over the years, our product has evolved to match the needs of our customers.

"The QuikServe Solutions team was very impressive in our meetings and we are excited to be moving forward," Taco John's International's Vice President and CFO, Jim Creel said in a statement to franchisees. "Taco John's International and QuikServe Solutions will continue to work together and look forward to developing the best solution possible for a mutually rewarding future," added QuikServe Solutions President, Kevin Simmonds. The best is yet to come!

Our mission: to find the most cost-effective and time-sensitive alternative in order to give franchisees and franchisors an all-access pass to critical restaurant management data. Web reporting on demand is here with our QuikServe Live suite of products. Ad-hoc, customizable charts, graphs and key metrics will soon be accessible via a secure web login portal; key, quarter-hour snap shots of sales and labor data is also available through our mobile application for iPhone, iPad, Android and some Blackberry devices. QuikServe Solutions is also making substantial financial investments to foster future software updates at no cost to current and future users of our back office product, QuikStation. We are also upgrading HelpDesk technologies as well as implementing several service best practices in order to better serve our Taco John's franchisees as well as all current and future customers.
