Confirm and collect the right totals every time

The AccuTOTAL PCD visually confirms and communicates customer order totals prior to request for payment. Mounted outside the pick-up window(s), the AccuTOTAL PCD helps increase drive-thru speed of service and helps prevent lost revenue from the payment process. Featuring Ultra Bright LED technology, the AccuTOTAL PCD

displays customer order totals from your point-of-sale system directly to your customer in the drive-thru.

The AccuTOTAL PCD encourages customers to prepare for payment in advance, thereby increasing speed of service. In addition, the AccuTOTAL PCD encourages complete order entry and discourages overcharges, ensuring correct payment. The AccuTOTAL PCD is offered as a stand-alone solution or can be integrated with our full line of order confirmation displays to form a complete drive-thru solution.
